& Co. Development Limited

COMPANY PROFILE

2026

NIGERIA

Engineering

Procurement

Technical solutions

OEM representation

Connecting global industrial technology with Nigerian energy operations.

01 / INTRODUCTION

Engineering value. Connecting global technology to Africa's energy industry.

Nuerich & Co. Development Limited is an indigenous Nigerian engineering, procurement, technical solutions and OEM representation company. Established in 2015 and headquartered in Warri, Delta State, we support Nigeria's oil, gas, offshore, marine, energy and industrial sectors.

Our role connects manufacturer expertise with the technical and commercial requirements of Nigerian operators. Engineering support, specialist equipment supply and logistics coordination form part of an integrated approach to facility delivery and ongoing operations.

GLOBAL MANUFACTURERS

International OEM relationships and specialist industrial products.

NIGERIAN OPERATIONS

Local market understanding, technical coordination and supply-chain support.

02 / WHO WE ARE

A Nigerian company. An international outlook.

Mission

Deliver dependable engineering and procurement support, connecting international supply chains with Nigerian operators through technically appropriate solutions and product traceability.

Vision

Build a recognised Nigerian energy-services company anchored in engineering competence, reliable delivery and lasting manufacturer partnerships.

OUR VALUES

Integrity

Clear commitments and accountable conduct.

Reliability

Consistent coordination and follow-through.

Partnership

Constructive operator and OEM relationships.

Technical excellence

Attention to specification and application.

Safety

Care for people, facilities and operations.

Local content & innovation

Nigerian participation and practical improvement.

03 / CAPABILITIES

Technical scope. Coordinated delivery.

Six complementary capabilities support projects and operating facilities across the asset lifecycle.

01 Engineering & EPC support

Design, construction, fabrication, installation and project coordination.

02 Procurement & supply chain

Strategic sourcing, manufacturer liaison, logistics and delivery.

03 Maintenance & asset integrity

Mechanical, E&I, inspection, coatings and maintenance planning.

04 OEM representation

Technical and commercial coordination with international principals.

05 Offshore & marine services

Facility works, process piping, shutdown and logistics support.

06 Technical & industrial solutions

Application-focused equipment and specialist industrial products.

04 / ENGINEERING

From engineering definition to site delivery.

Engineering and construction support for brownfield upgrades, greenfield works and facility modifications.

Multi-discipline coordination brings design requirements, fabrication activities and installation planning into the same delivery framework.

Engineering & design

FEED support, process modelling, detailed civil, structural, mechanical and E&I engineering, P&ID development and HAZOP reviews.

Construction & fabrication

Modular construction and pre-assembly, process piping, structural fabrication, onshore and offshore installation, rigging and lifting.

Commissioning & project management

Commissioning and system turnover, constructability and maintainability reviews, project controls, schedule, cost and risk coordination.

05 / PROCUREMENT

Global technology. A clear route to site.

Technical procurement connects equipment specification, manufacturer supply and delivery to the end user.

01 — OEM / INTERNATIONAL MANUFACTURER

Product selection, technical clarification and supply documentation.

02 — NUERICH TECHNICAL & COMMERCIAL COORDINATION

Specification alignment, vendor coordination and commercial terms.

03 — INTERNATIONAL LOGISTICS

Freight planning and shipment coordination.

04 — NIGERIA / IMPORT & DELIVERY SUPPORT

Customs documentation, warehousing and last-mile delivery.

05 — CLIENT / ONSHORE OR OFFSHORE FACILITY

Handover documentation and lifecycle support.

PROCUREMENT DISCIPLINE

OEM-direct sourcing, manufacturer traceability, product certification checks, vendor qualification and technical bid support.

Supporting asset condition and operating continuity.

Maintenance planning and technical services for process facilities, utilities and offshore operations.

Plan

Preventive and corrective maintenance planning, maintenance packages, CMMS setup and asset lifecycle support.

Maintain

Mechanical and piping services, electrical and instrumentation support, overhaul and rotating-equipment maintenance coordination.

Inspect & protect

Fabric maintenance, coatings and inspection activities to support asset integrity.

Shutdown & restore

Shutdown and turnaround support, power-plant maintenance and coordinated return-to-service activities.

PLANNING / FIELD WORK / INSPECTION / HANDOVER

Products selected for the application.

A specialist portfolio connecting process performance, equipment integrity and personnel safety.

PROCESS & FLUID SYSTEMS

Flow control, process pumps, chemical dosing, spray technology and seamless pipes.

MEASUREMENT & CONDITION

Temperature instrumentation, signal conditioning, filtration and separation.

INTEGRITY & PROTECTION

Coating inspection, cathodic-protection testing, transit sealing and passive fire protection.

PEOPLE & INDUSTRIAL ENVIRONMENTS

Hazardous-area mobility, lone-worker protection, escape-route markings, lifting and industrial noise control.

08 / OEM PORTFOLIO

Flow control & fluid handling.

Current Nuerich OEM / principal network. Product suitability depends on the specified duty and selected model.

01 **Hartmann Valves**

Ball valves and wellhead equipment

Application: Flow isolation and wellhead duties in upstream and process systems.

02 **VALVOSIDER**

Ball, gate, globe and check valves

Application: Isolation and flow management in piping systems.

03 **ANTICO**

Corrosion-resistant chemical and process pumps

Application: Transfer of corrosive fluids in chemical and process applications.

04 **JESSBERGER Pumps**

Drum, barrel and container pumps

Application: Fluid transfer from drums, barrels and containers.

05 **ProMinent**

Dosing pumps, chemical dosing and water-treatment systems

Application: Chemical addition and water-treatment duties.

06 **PNR Italia**

Spray nozzles and tank-cleaning heads

Application: Spray applications and cleaning of industrial tanks.

Process integrity & industrial systems.

Current Nuerich OEM / principal network. Product suitability depends on the specified duty and selected model.

07 **Tubos Reunidos Group**

Seamless steel pipes and tubes

Application: Piping and tubular requirements in energy and industrial facilities.

08 **Tinker & Rasor**

Holiday detectors and cathodic-protection testing equipment

Application: Coating inspection and corrosion-protection testing.

09 **Graver Technologies**

Filter cartridges, filtration media and separation technologies

Application: Process filtration and separation duties.

10 **Status Instruments**

Temperature transmitters, signal conditioners and digital indicators

Application: Temperature measurement and field-signal interfaces.

11 **ALARA**

Acoustic enclosures, silencers and industrial noise-control systems

Application: Noise management around industrial equipment.

12 **CROMOX**

Stainless-steel lifting chains, hooks and shackles

Application: Lifting and rigging in marine and industrial environments.

Facility protection & personnel safety.

Current Nuerich OEM / principal network. Product suitability depends on the specified duty and selected model.

13 **Hawke Transit System - HTS**

Cable and pipe transit sealing systems

Application: Sealing of cable and pipe penetrations in facilities and marine structures.

14 **TENMAT**

Passive fire protection and high-temperature insulation materials

Application: Fire protection and thermal insulation applications.

15 **Everlux / Sinalux**

Photoluminescent safety signs and escape-route markings

Application: Safety communication and escape-route identification.

16 **i.safe MOBILE**

Intrinsically safe smartphones, tablets and smartwatches

Application: Mobile communication and digital workflows in hazardous areas.

17 **SoloProtect**

Lone-worker safety devices, alarms and emergency solutions

Application: Lone-worker protection and emergency alerting.

Support across the offshore facility.

Engineering, procurement and maintenance support for offshore operating environments.

FACILITY INTERFACES

- Topside process
- Utilities & instrumentation
- Safety & hazardous areas
- Flow control & piping
- Corrosion protection
- Maintenance & supply chain

CONSTRUCTION & MODIFICATIONS

Brownfield and greenfield support, process piping prefabrication and installation, tank and vessel works, E&I activities and facility upgrades.

OPERATING-FACILITY SUPPORT

Shutdowns, maintenance, pipeline integrity testing, marine logistics, offshore procurement, specialist equipment supply and OEM technical coordination.

Representative offshore imagery. No construction or ownership claim implied.

Energy is our core. Industry broadens our scope.

OIL & GAS

Upstream, midstream and downstream operators. EPC contractors, FPSO operators and technical procurement teams.

Marine & offshore

Vessel and offshore-facility support, specialist equipment and logistics.

Power & utilities

Power-plant maintenance, equipment procurement and utility systems.

Industrial manufacturing

Process equipment, plant maintenance and facility support.

Infrastructure

Civil works, marine terminals, jetties and structural requirements.

Mining

Heavy-equipment supply, chemical procurement and fabrication support.

Global technology. Local execution.

Nuerich brings manufacturer relationships and Nigerian market knowledge into the same technical and commercial conversation.

Manufacturer access

A defined international principal network spanning flow control, fluid handling, asset integrity and industrial safety.

Technical procurement

Specification review, application clarification, vendor coordination and product-documentation checks.

Local understanding

Knowledge of Nigerian procurement requirements, import processes and the realities of onshore and offshore delivery.

Lifecycle perspective

Engineering, procurement, maintenance and OEM technical support considered together.

Disciplined procurement. Responsible delivery.

Safety, quality and traceability are integral to technical selection and project coordination.

Product certification checks, manufacturer documentation and vendor qualification support procurement decisions. Engineering and field activities require the applicable project standards, site controls and client specifications.

REGULATORY & QUALITY REFERENCES

ISO 9001	Quality-management standard
NCDMB	Nigerian content regulator
NIPEX	Industry procurement and contracting platform
NUPRC	Upstream petroleum regulator
NCEC	Nigerian Content Equipment Certificate

These references appear in the existing corporate material. This profile does not attest to certificate status, registration scope or current validity. Applicable evidence should accompany vendor qualification and tender submissions.

GLOBAL TECHNOLOGY. LOCAL CAPABILITY.

ENGINEERED FOR AFRICA'S ENERGY FUTURE.
